Partner Task - Fun with Potentiometers!

Part 1.

Download the demo code from the website, implement and demo.

Hacker edition: Have the selection be among three LEDs.

Part 2.

The hardware will be identical to that of part 1.

1. when the potentiometer is in the lower half of the range, only one LED will blink, when you turn it past the halfway point, two LEDs will blink.

2. Hacker #1: Have it working with 3 LEDs.

3. Hacker #2: When the potentiometer is at its lowest setting (0) have it turn off all LEDs.
